INTRODUCING:
The Continuum Reproductive Center – Mt. Kisco, NY
Comprehensive, Personalized Infertility Care

New York, NY (January 20, 2010) The Continuum Reproductive Center (CRC) of St. Luke's and Roosevelt Hospitals in Manhattan – known for comprehensive, personalized infertility and reproductive endocrinology care; technologically-advanced IVF with high success rates and affordability – is pleased to announce the grand opening of the Continuum Reproductive Center of Mt. Kisco, which will offer the same array of services as its Manhattan offices.

Under the leadership of Matthew Lederman, MD, a fellowship-trained reproductive endocrinologist and board-certified obstetrician-gynecologist, the CRC in Mt. Kisco offers services including: the evaluation and treatment for male factor infertility; anovulation; polycystic ovarian syndrome, unexplained infertility; endometriosis; tubal factor infertility; diminished ovarian reserve; recurrent pregnancy loss and fibroids. Also provided will be saline sonohysterography, ovulation induction, semen analysis, intrauterine insemination, fertility surgery, in vitro fertilization, egg freezing and a donor egg program.

Dr. Lederman and the CRC-Mt. Kisco team will be working in concert with Martin Keltz, MD and Daniel Stein, MD, physician-leaders of the CRC in Manhattan. The scientific staff at the CRC's Manhattan IVF laboratory is highly-experienced in all of the latest techniques, including intracytoplasmic sperm injection, assisted embryo hatching, embryo defragmentation, preimplantation genetic diagnosis

CRC-Mt. Kisco is conveniently located at 83 South Bedford Road in Mt. Kisco, New York. Most major insurance is accepted. To schedule an appointment, please call 914-244-8749.
